Profile

Front-end/UI Developer with 4.7+ years of experience building scalable, responsive web applications using HTML5, CSS3, JavaScript, ReactJS, React Native, TypeScript, and SCSS. Proven expertise in delivering high-quality UIs for high-traffic products like Walmart, RummyCircle, and Wowzy Ludo.

Professional Experience

Frontend Developer   01/2025 – 09/2025 | Bangalore, India
Games24x7 ☒

- Developed reusable UI components in ReactJS and React Native for RummyCircle and Wowzy Ludo, improving performance and responsiveness across web and mobile platforms. Translated Figma designs into functional, pixel-perfect UIs using SCSS and modern JavaScript.
- Contributions included creating reusable components, optimizing performance, translating designs into high-quality code, integrating APIs, and ensuring seamless data flow between frontend and backend systems. Also optimized components for maximum performance across different devices and browsers.

Software Engineer - Frontend   02/2022 – 07/2024 | Bangalore, India
Tech Mahindra ☒

- Built responsive UI for Walmart using HTML5, CSS3, ReactJS, and ES6. Created modular, testable components and integrated REST APIs. Collaborated with backend and design teams to deliver feature-rich pages.
- Constant interaction with back-end and design teams on the execution of ideas and projects.

Web Developer   06/2020 – 01/2022 | Bangalore, India
Dotline Web Media Pvt Ltd ☒

- Developed responsive web user interfaces (UI) using HTML5, CSS3, JavaScript, and Bootstrap 4, while maintaining and enhancing website functionality by optimizing applications for maximum speed and performance.
- Also performed integration testing, debugging, and maintained hosting servers to ensure smooth website performance.

Education

BSc IT   2014 – 2017 | Agartala, India
Tripura University ☒

MSc IT   2017 – 2019 | Bangalore, India
Jain University ☒

Skills

HTML5, CSS3, JavaScript, React JS, React Native, TypeScript, Redux, Git, SCSS

Projects

TMDB Movie App ☒
TMDB Movie App Built a responsive movie discovery web application using React.js, Redux, and Tailwind CSS, integrated with The Movie Database (TMDB) API to fetch trending movies, TV shows, and detailed information. Implemented features like dynamic search, category-based filtering, and state management for smooth user experience.
